

Please reject petition 04-160. I depend on satellite radio for my weather information and entertainment. When listening to broadcast radio my family is always in danger of hearing vile filth while I attempt to retrieve news and weather info. On satellite the channels are all news or all weather or all traffic with no danger of being subjected to off color comments or vulgar material. The AM/FM bands seem to be a haven for this type of content. Please reject the NAB petition. Their greed seems to be boundless. Thank you.
